

Assessment Item – 09

Shaleen has Rs. 4800 in his bank account. He withdrew Rs. 1500 from the account for her daughter's bag. Two days later, he withdrew another Rs. 1000 for household items.

$$4 \times 2 = 8$$

a. How much money was there in Shaleen's account?

b. How much money did Shaleen withdraw to buy daughter's bag?

c. How much money did Shaleen withdraw for household items?

d. How much money was left in Shaleen's account at the end?

Learning Outcome– We learnt to read, write and recognise the numbers of notes from 5 – 2000 and use them in daily life.
