An earthquake is when the ground shakes. It happens because of strong forces moving deep underground. The shaking can make buildings move and sometimes fall. It can be scary but we stay safe by hiding under tables and staying away from windows. Scientists study earthquakes so they can help people prepare. When we know what to do, we stay safe during an earthquake. Staying calm and knowing our safety plan helps us stay safe when the ground shakes. Remember, earthquakes are natural events that we cannot control, but being prepared helps protect us and our families.
