

Worksheet 59**Remember that:**

We use kilometer to measure distance! Meter is used to measure short distance and centimeter is used to measure very short distance! Kilometer is also written as km, meter as m and centimeter as cm! Very small lengths are measured in millimeters and are also written as mm!

10 millimeters = 1 centimeter

100 centimeters = 1 meter

1000 meters = 1 kilometer

1. Write correct unit of measurement for the following things.

- ☞ Thickness of paper – (cm, mm, m, km)
- ☞ Distance between two buttons – (cm, mm, m, km)
- ☞ Length of swimming pool – (cm, mm, m, km)
- ☞ Width of book – (cm, mm, m, km)
- ☞ For measuring cloth – (cm, mm, m, km)

We have learnt - Measurement of Length (Kilometer, Centimeter, Meter, Millimeter).
