

Worksheet 60

Remember that:

We use kilometer to measure distance! Meter is used to measure short distance and centimeter is used to measure very short distance! Kilometer is also written as km, meter as m and centimeter as cm! Very small lengths are measured in millimeters and are also written as mm!

10 millimeters = 1 centimeter

100 centimeters = 1 meter

1000 meters = 1 kilometer

1. Answers the questions

☞ 400 cm = _____ m

☞ 600 cm = _____ m

☞ 1000 m = _____ km

☞ 1700 m = _____ km

☞ 1100 m = _____ km

☞ 2 km = _____ m

☞ 1 km = _____ m

We have learnt - Measurement of Length (Kilometer, Centimeter, Meter).
