

Lesson 7 - Legal Information

Worksheet 61

Let's learn

<p>Milligram: A very small unit, often used for medications.</p>	
<p>Gram: The base unit in the metric system, used for small items like spices or small amounts of food.</p>	
<p>Kilogram: A larger unit, used for heavier items like groceries or body weight.</p>	

1000 milligrams = 1 gram

1000 grams = 1 kilogram

1. Fill in the blanks based on the above information:

☞ 1000 mg = _____ grams

☞ 2000 mg = _____ grams

☞ 1000 grams = _____ kilograms

☞ 1700 grams = _____ kilograms _____ grams

☞ 1900 grams = _____ kilograms _____ grams

☞ 1 kilogram = _____ grams

☞ 1.5 kilograms = _____ grams

We have learnt - Measurement of weight (milligram, grams and kilograms)
