WORLD OF WORK

EDUCATION WORKSHOPS

2024-2025

Shri Sanjay Kumar
Secretary

Department of School
Education & Literacy,
Ministry of Education
Government of India

Message

Education is the pillar on which a society builds its edifice. An educated child can transform home, society, economy and nation. Any knowledge, any type of education, strives for improvement. It is one of the essential tools for upward mobility in society.

Its correlation with the real world is therefore very important. An education done in an ivory tower, away from the humdrum of life, is of little use in bringing about the kind of change which it is meant for.

It is vocational education which provides that connect which is necessary for a society to get high quality human resource. In India, statistics show that on an average, about 12 per cent students drop out of schools at the secondary level.

With a student population of 26 crore, this percentage translates into a big number. General perception is that vocational education is meant for such students –who drop out of schools. But this perception is flawed at many levels as it fails to provide 88 per cent of students who progress to higher levels in schools, the opportunity to learn at the right time which direction they should take their education to.

In an expanding and evolving economy there are a plethora of employment options which industry offers but unless our children are prepared at the right time for them, it will be difficult to channelize their energies in the desirable direction.

This is where reimagining of vocational education becomes important and the National Education Policy 2020 puts significant emphasis on this. This policy aims to overcome the social status hierarchy associated with vocational education and stresses on integration of vocational education programmes into mainstream education in all education institutions in a phased manner. It says that beginning with vocational exposure at early ages in middle and secondary school, quality vocational education will be integrated smoothly into higher education. This will ensure that every child learns at least one vocation and is exposed to several more.

I am happy to know that PARAKH NCERT's World of Work project aims to do exactly this.

Shri Anandrao V Patil
Additional Secretary

Department of School
Education & Literacy,
Ministry of Education
Government of India

Message

The National Education Policy 2020 talks about the need to reimagine vocational education. As per estimates made during the 12th Five Year Plan (2012-2017) the percentage of skilled workforce in India, in the age group of 19-24 years, is less than 5 per cent. Considering that these estimates are at least eight years old, if not more, and assuming that there has been substantial improvement in this direction, this percentage would still be lower than global standards. For instance, in the US this number is 52 per cent, in Germany 75 per cent and in South Korea it is as high as 96 per cent. These numbers, says NEP 2020, underline the urgency of the need to hasten the spread of vocational education in India.

The Department of School Education and Literacy is implementing the initiative of Vocationalisation of School Education under the umbrella of the Centrally sponsored scheme 'Samagra Shiksha'. The scheme aims at integrating vocational education with general academic education in all secondary / senior secondary schools; enhancing the employability and entrepreneurial abilities of the students, providing exposure to work environment; and generating awareness amongst students about various career options so as to enable them to make a choice in accordance with their aptitude, competence and aspirations.

The scheme covers Government and Government aided schools. Under the scheme, National Skill Qualification Framework (NSQF) compliant vocational courses are offered to the students from class 9th to 12th in the schools covered under the scheme. At the secondary level i.e. class 9th and 10th, vocational modules are offered to the students as an additional subject. At senior secondary level, i.e. class 11th and 12th, vocational courses are offered as a compulsory (elective) subject.

With a student population of 26 crore, the task of ensuring that all students at the level of class 9th and 10th receive some information about career possibilities later in life, is challenging.

I complement PARAKH NCERT for envisioning the transition of children into the World of Work and spreading this message across the length and breadth of this country.

Foreword

The National Curriculum Framework for School Education (NCF SE) makes an important distinction between vocational education and skill training. It explains that capacities are broader human abilities that combine a variety of skills in a coherent manner to accomplish a complex job. Skills, on the other hand, are narrower knowhow to complete a specific task. For example, cooking is a capacity, while cleaning, cutting, frying, and sautéing are skills.

One of the objectives of vocational education, according to NCF SE, is building of vocational capacities for all students, i.e., knowledge, and relevant values which will create the possibility of their joining the workforce after school if they choose to.

Effective school education therefore should provide the possibility of learning a range of vocations to students - ones that are aspirational, as well as those that are most relevant locally and contextually (if different), also new and emerging vocations.

In the World of Work (Wow) project we have incorporated all these elements and more – difference between aspirational and relevant vocations; dignity of labour, pathways for future and recognition of the work that children already do in homes and communities.

This report is based on the first phase of this project. A small start has been made but there are miles to go yet.

I congratulate the PARAKH which worked on this project and wish them success for the subsequent phases of Wow project.

Prof. Dinesh Prasad Saklani

Director, NCERT

PREFACE

Prof Indrani Bhaduri

CEO, PARAKH and Head,
Educational Survey Division NCERT

In line with the focus of National Education Policy 2020 on vocational education, PARAKH NCERT has been working on creating an effective programme to introduce children to different forms of work.

As the National Curriculum Framework for School Education puts it, we must “reconcile two requirements... one, we must not (and cannot) determine which vocations must be taught and learnt in a particular school or set of schools because there are too many vocations and too many considerations at the local level. Two, we must be able to provide a framework to educate students for vocational education.”

This reconciliation, it says, is possible with a valid and useful typology of work, which it calls ‘forms of work.’ The NCF SE groups vocations on the basis of some fundamentally common elements into the same type. They require similar or overlapping capacities and knowledge.

The three groups into which it categorises work are:

Work with life forms: Right from the time of hunting and gathering to a more settled life of animal husbandry and agriculture, human beings have used their capacities to work with life forms to not just survive, but also to produce an adequate surplus to live a life of thought and reflection. Thus, the capacity to do productive work with plants and animals is fundamental to human survival and flourishing.

Work with materials and machines: The second significant achievement in human progress is our ability to use materials and machines in simple to very sophisticated ways. Be it for food, clothing, and shelter to meet our basic necessities or for far more complex ways to satisfy our curiosity and creativity, we have developed tools and machinery. Thus, the capacity to do productive work with materials and machines is fundamental to engaging with complex modern life.

Work in human services: Starting from trade and transport to media and entertainment, we have created different services that have allowed us to cooperate well beyond our kinship groups. These services have improved our lives tremendously well beyond what agriculture or industry could provide. Thus, the development of capacities to work in human services is truly relevant in this age of global exchange.

With these basic guidelines in front of us, PARAKH embarked on creating an interesting journey for children to transition into the world of work.

Since this was envisioned as an on-ground project with physical touch points in every state and Union Territory of India, an important consideration was selection of schools. There are more than 10 lakh government schools in India. In order to have a framework for selection, it was decided to conduct the World of Work (Wow) workshops in PM Shri schools. Another layer of selection was added in the form of location of schools – it was deliberately decided to reach out to schools which were away from big cities and catered to children in rural and semi-rural areas as they often cater to children from disadvantaged sections of society. The help of state education departments was taken to identify the most appropriate school for conducting the Wow workshop and creating the Wow Corner.

In 36 schools we have created Wow Corners where the charts on different industry sectors and the kind of jobs they provide are illustrated. These charts are meant as much for students as they are for parents visiting the schools so that they see and understand the vastness and the multiplicity of job roles and career options that the world of work offers.

An important element of each workshop was a session on Generative Artificial Intelligence because the future of work is inextricably linked to technology. A start has been made and students initiated into ways in which they can build on their technical capabilities. We are hopeful that our ever-dedicated teachers will keep track of these learnings and spread the awareness far and wide.

Prof Indrani Bhaduri
CEO, PARAKH and Head,
Educational Survey Division NCERT

ACKNOWLEDGEMENTS

PARAKH, NCERT, Ministry of Education, expresses its heartfelt gratitude to the State Project Directors (SPD), schools, principals, and District Education Officers (DEO) who extended their invaluable support in organizing the World of Work workshops across various states and union territories of India.

We begin by thanking **Mrs. Siduniu Rentta**, Principal of Mount Tabor Retreat Centre, **Kohima, Nagaland**, for the session held on 6-7 November 2024.

In Assam, the workshop was successfully conducted at **PM Shri Jawahar Navodaya Vidyalaya, Dibrugarh** on 11-12 November 2024, under the guidance of **Dr. J. N. Patel**, with administrative support from **Dr. Samiron Bora**, AES-1 and Inspector of Schools & DEEO, Dibrugarh.

On 21-22 November 2024, we covered three states, **Rajasthan, Himachal Pradesh and Tripura**. In Jaipur, Rajasthan, we thank **Dr. Jaishree Bhargava**, Principal of PM Shri Government Adarsh Girls Senior Secondary School, Ganguari Bazar, and **Manju Sharma**, Chief District Education Officer.

In **Shimla, Himachal Pradesh** we were supported by **Dr. Rashima Rana**, Principal of PM Shri Government Senior Sec School of Excellence, Totu, and **Jay Dev Negi**, Principal, DIET Shimla.

In **Agartala, Tripura**, our heartfelt thanks to **Shibsankar Pal**, Principal of PM Shri Kamini Kumar Singha Memorial School, and **Rupan Ray**, District Education Officer, for their support on 21-22 November 2024.

In Puri, Odisha, we acknowledge the contribution of **Mrs. Nandita Sahoo**, Principal of PM Shri Government High School, Balanga, and **Manoj Kumar Padhy**, Special Secretary, School & Mass Education Department, Odisha, for facilitating the session in **Puri** on 27-28 November 2024.

In **Chandigarh**, the session on 28-29 November 2024 was made possible by **Manjit Kaur**, Principal of PM Shri Government Girls Model Senior Sec School, and **Bindu**, Deputy Director Education.

From 5-6 December 2024 we again covered three states and one Union Territory i.e. **Meghalaya, Puducherry, Karnataka and Kerala**. Our sincere thanks to **C Challam**, Principal of PM Shri Government Girls Higher Secondary School, Shillong, and Vice Principal **Mr A Allya**, for supporting the session in **Meghalaya**.

Simultaneously, on the same dates in **Puducherry**, the workshop was hosted at PM Shri Kamban Government Higher Secondary School, Nettapakkam, with the support of **Radjasegarane**, Principal, and **Dr. V.G. Sivagami**, Joint Director, Directorate of School Education.

Bangalore South, Karnataka also hosted its session on 5-6 December 2024. We appreciate **Veena**, Principal of PM Shri Girls High School, Attibele, and **M.R. Maruthi**, Director of Education.

In **Trivandrum, Kerala**, we thank **Geetha Gopinathan**, Principal of PM Shri Government Girls Higher Secondary School, Cotton Hills, and **Sheeja**, Deputy Director of Education from **5-6 December 2024**.

In **Haridwar, Uttarakhand**, on 12-13 December 2024, we thank **Poonam Rana**, Principal of PM Shri Government Girls Inter College, Jwalapur, who also served as the education officer for the workshop.

A cluster of workshops followed on 19-20 December 2024. The session in **Raipur, Chhattisgarh**, held on 19-20 December 2024, was led by **Rakesh Gupta**, Principal of PM Shri Pandit R.D. Tiwari Government High School, with support from **Rakesh Pandey**, Joint Director Education, and **Ashish Gautam**, Program Coordinator, SPD.

On the same dates, **Kolkata, West Bengal**, hosted a session at PM Shri Kendriya Vidyalaya, Ballygunge, supported by **Uttam Kumar**, Principal.

In **Hyderabad, Telangana** too, the workshop was held on 19-20 December 2024 at PM Shri Government High School, Shaikpet, supported by **Kurakula Mallaiah**, Principal, and **Rohini**, District Education Officer. **Lucknow, Uttar Pradesh**, also hosted its workshop on these dates, with thanks to **Vinod Kumar**, Principal of PM Shri, Captain Manoj Pandey Sainik School, and **Ajay Dubey**, SPD MIS Coordinator.

On 16-17 January 2025, Jharkhand, Maharashtra and Bihar hosted the workshops. In **Ranchi, Jharkhand**, the event was supported by **Anand Lal**, Principal of PM Shri Middle School, Bariyatu, and **Vinay Kumar**, District Education Officer, along with **Alka Jaiswal**, RDDO.

On the same dates in **Nagpur, Maharashtra**, we acknowledge **Pournima A. Meshram**, Principal of PM Shri Nagar Parishad High School, Kalmeshwar, and **Pramod Wankhede**, District Education Officer.

Patna, Bihar also held its session on 16-17 January 2025, with thanks to **Rajesh Kumar**, Principal of PM Shri Upgraded Senior. Sec. School, and **Sanjay Kumar**, District Education Officer.

Kavaratti, Lakshadweep held its session on 16-17 January 2025, supported by **C.P. Khaleel**, Principal, and **Dilshad Babu**, State Project Officer, Samagra Shiksha.

Bhopal, Madhya Pradesh, hosted the session on 23-24 January 2025, with the guidance of **Smita Meshram**, Principal of PM Shri Government Girls Higher Secondary School BHEL, and **Narendra Ahirwar**, District Education Officer.

Visakhapatnam, Andhra Pradesh, conducted its workshop on 30-31 January 2025, with support from **Choppara Chinnamayi**, Principal of PM Shri Government High School, Pendurthi, and **N. Prema Kumar**, District Education Officer.

Chennai, Tamil Nadu, also held its event on the same dates at PM Shri Kendriya Vidyalaya, Anna Nagar, led by **Smita Unnikrishnan**, Senior Teacher, and supported by **Nirmalendu Kar**, Principal.

Andaman & Nicobar Islands conducted the session on 30-31 January 2025, thanks to **P. Nair**, Principal of PM Shri Government Girls Senior. Sec. School, and **Dinesh Singh**, Project Officer.

Gandhinagar, Gujarat, hosted the session on 6-7 February 2025, with thanks to **Vaishaliben Faldu**, Principal of Government Sec School, RMSA Isanpur Dodiya, and **Dr. B.N. Prajapati**, District Education Officer.

Simultaneously on 6-7 February, 2025, **Gangtok, Sikkim**, organized its session at PM Shri Sir TNSSS Gangtok, supported by **Anita Kafley**, Principal, and **Chime**, Chief Education Officer.

In **Ludhiana, Punjab**, on 13-14 February 2025, the workshop was led by **Gunjit Kaur Sekhon**, Principal of Government High School, Mullanpur, and **Dimple Madan**, District Education Officer.

Daman & Diu conducted its workshop on 6-7 March 2025, supported by **Harendra Pathak**, Principal of Government Secondary School, and **Mr. I. V. Patel**, Principal, DIET, Directorate of Education, Daman and Diu

The session in **Delhi**, held on 17-18 March 2025, was supported by **P.D. Sharma**, Principal of Government Co-ed SSS, Dwarka, and **Smt. Bimla Kumari**, Deputy Director of Education (Vocational).

On 20-21 March 2025, again three states and one Union Territory hosted the workshops. These were **Ladakh, Haryana, and Manipur**. At the Leh, Ladakh we acknowledge **Tsering Norbu**, Principal of Government Boys Higher Secondary School, and **Sonam Wangchuk**, Chief Education Officer.

Ambala, Haryana, also hosted the workshop on 20-21 March 2025 at PM Shri Government Senior Sec School, Baldev City, led by **Sarbir Saini**, Principal, and **Suresh Kumar**, District Education Officer.

In **Imphal, Manipur**, on 20-21 March 2025, we thank **Changamayan Damayanti Devi**, Principal of Malom Megha High School, and **Thokchom Lucy Devi**, Assistant Program Officer, Samagra Shiksha.

In **Chhingchhip, Mizoram**, on 27-28 March 2025, we thank **Anshul Gupta**, Principal of Sainik School Chhingchhip, and **Lt. Col. Kartik Sood**, Principal.

In **Srinagar, Jammu & Kashmir**, on 24-25 March 2025, our gratitude goes to **Thahirudeen**, Principal of PM Shri Kendriya Vidyalaya No. 1 Srinagar, and **Amarjyoti Sharma**, Principal.

The last session of the project was held in **Arunachal Pradesh and Goa**. In Arunachal Pradesh it was conducted at East Siang district, Pasighat, on 27-28 March 2025, and we thank **Mr. Manoj Deka**, Senior Master, Sainik School, East Siang and **Commander Pravin Kumar Pola**, Principal, Sainik School, East Siang.

In **Goa** the workshop was successfully conducted on 28-29 March 2025 at PM Shri Government High School, Kudchire, Bicholim, Goa. We sincerely acknowledge the efforts of **Mrs. Sarveda G. Gaonkar**, Principal of the school and also the main coordinator of the workshop.

WORLD OF WORK

Augmenting the World of Work with Schooling and Assessment

Workshops to create awareness among secondary school students about career pathways

Background

One of the mandates of PARAKH (Performance Assessment, Review and Analysis of Knowledge for Holistic Development) is to create parity among different school boards in the country. This parity is mainly targeted towards the standard of assessment in different states.

With the National Curriculum Framework for School Education (NCF-SE) emphasising on vocational education as an important component of holistic development of students and preparing them for the needs of the 21st century, the role of PARAKH in setting standards of curriculum and assessment for vocational education in different boards becomes important.

The purpose of vocational education is to provide students with a broad and experiential introduction to different kinds of work and develop a deep and defined set of practical competencies. It is in assessment of these competencies that PARAKH is going to play an important role in times to come.

Objectives of PARAKH WoW Campaign

- Create a national-level project for alignment of curriculum of vocational education in school boards
- Prepare school boards for assessment of vocational qualifications
- Create awareness about career pathways among school students

Competencies imparted in WoW project

- Thirty six sectors of industry, job opportunities that they offer and kind of roles to expect
- Critical thinking
- Creativity
- Communication skills

- Collaboration
- Entrepreneurship skills
- Applications of Generative AI

Aim of PARAKH WoW Campaign

- Awareness generation:** Vocational capacities, knowledge, and relevant values were developed for school students, which created the possibility of their joining the workforce after school if they choose to.
- Peek into the world of work:** The workshop opened the window of possibilities for a range of vocations - ones that are aspirational, compared to those that are most relevant locally and contextually (if different), and also new and emerging vocations.
- Dignity of work:** Students were provided exposure to various types of work so as to make them understand and appreciate the dignity of each vocation.
- Pathway to future:** The workshops were in synch with current reality and resources of schools, while providing a pathway to the future. Students were given an overview of what their future will look like if they choose any of the career choices which will be available to them.
- Introduction to AI:** Students were specially introduced to the concept of artificial intelligence through simple demonstrations / presentation / videos. They were encouraged to enroll in specific basic online courses on this subject and their teachers were requested to monitor their progress.
- WoW Corner:** In one school in every state a World of Work corner was created where charts on career options in 36 different sectors were put up for permanent display. Schools were requested to create this WoW Corner at a strategic location where there would be high footfall, which was near the office of the Principal and where parents were likely to see the options of different careers which their students could go into.

Structure of the Workshop

Day 1: Understanding the World of Work

- Recognition and value of work being done: Students already do different types of work at home, such as helping in the kitchen, helping with household chores, helping grandparents, neighbours etc. Some students also help supplement the family's income by doing odd jobs after / before school. They were explained how this activity at home-level will transform into a more formal activity at the workplace. The competencies that are required to fulfil the formal activities of workplace were explained to students.
- Aspirational vocations versus locally relevant vocations: Some vocations are more aspirational than others. On the other hand, some vocations may have greater
- Opportunities for employment around. Often, the aspirational vocations are different from the ones that may have greater employment opportunities locally or in the vicinity. Hence, the choice of which vocations to educate for must be made at the local level, either the school or the district –considering these factors.
- Broad overview of skill training: The world of work requires specific skills to navigate. How these skills are imparted and how their attainment is assessed is what the workshop aimed at illustrating. For example, IT skills, computer skills, communication skills and entrepreneurial skills.

- Dignity of work and wide-ranging exposure: For many students, experience of work is limited to what they see around them. For example, in rural areas, they have no exposure to machines or services. On the other hand, students in large cities have no exposure to land-based vocations. This session provided them exposure to the range of occupations and vocations including agriculture to machines and manufacturing, to various services including community health. Such wide exposure not only created the base for the choice of vocations subsequently but also established the dignity of all types of work.
- Values and dispositions related to work: Students were made aware of the power of persistence and focus, curiosity and creativity, empathy and sensitivity, collaboration and teamwork. They were guided to do physical work and pay keen attention to details.

Day 2: Practice Time

- Students were given an overview of new-age skills such as Artificial Intelligence.
- They were divided into groups and given an activity of depicting on a chart paper the industry sector where they would like to work in future. Each group was then made to make a presentation about their depiction where each member of the group was required to explain the role that they would play in their chosen field of work.

According to UDISE+ data of 2023-24, out of 14.5 lakh schools in India, only 1.3 per cent schools, i.e., only about 20,000 schools offer vocational courses as per

National Skills Qualification Framework (NSQF) at secondary level.

KEY STATISTICS

36 states and Union Territories covered

over **146** days by a team of **25**

to conduct workshops with over **4000**

students from

100 schools

36	28 - 29	March	Goa	PM Shri Government High School, Kudchire, Bicholim, Goa

KEY COMPONENTS OF WORKSHOPS

Students are very excited and keen to know about the different career options available to them after class XII

In every workshop, less than 10 per cent students showed awareness about offbeat careers such as becoming an architect, psychiatrist or a neuro surgeon.

Teachers also found the information about new-age career options very useful. Most of them were only familiar with traditional career choices.

There is high level of awareness among students of government schools in all states and Union Territories about Artificial Intelligence (AI) and its use in everyday life.

Students are generally well-versed with using AI tools such as ChatGPT to find answers to questions and to create designs and images.

Without exception, students in all states and Union territories, came across as very bright and confident. They are expressive and curious to learn about the world of work. Given that the workshops were conducted in government schools in rural areas, which mostly cater to disadvantaged sections of population, the positive response from students was exceedingly heartening.

NAGALAND

6-7 NOVEMBER 2024, MOUNT TABOR RETREAT CENTRE, KOHIMA

Workshop No 1

**IDEAL FOR THOSE
CHILDREN WHO
LIKE PLAYING WITH
MACHINES**

AEROSPACE, AVIATION

Aerospace encompasses the broader study of flight and space travel, including the design, development, and operation of aircraft and spacecraft, while aviation specifically focuses on the operation of aircraft. It is a multi-billion dollar industry in India. The sector offers jobs at airports such as cargo handling, ground support, airport operations; in airlines as reservation agent, customer service as well as in flying of aircraft as pilot or crew.

SAMPLE JOB ROLES

- Reservations
- Mechanic
- Cabin Service, Ramp Service
- Baggage Handling
- Ground Support

SAMPLE JOB POSITIONS

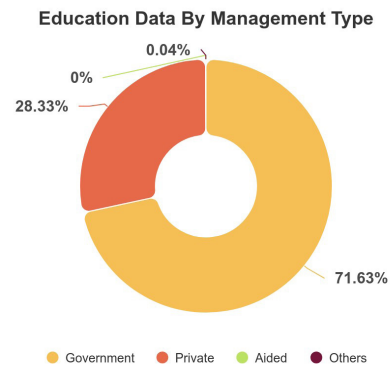

- Airline Reservation Agent
- Airline Customer Service Executive
- Airline First Officer
- Airline Cabin Crew
- Airline Ramp Executive

Background

There are 2725 schools in Nagaland which cater to 4.1 lakh students, according to UDISE+ report for 2023-24. More than 70 per cent schools are government schools and 30 per cent schools are private. Private schools cater to 65.6 per cent of the state's school-going students while 34 per cent students go to government schools. The state has 32602 school teachers.

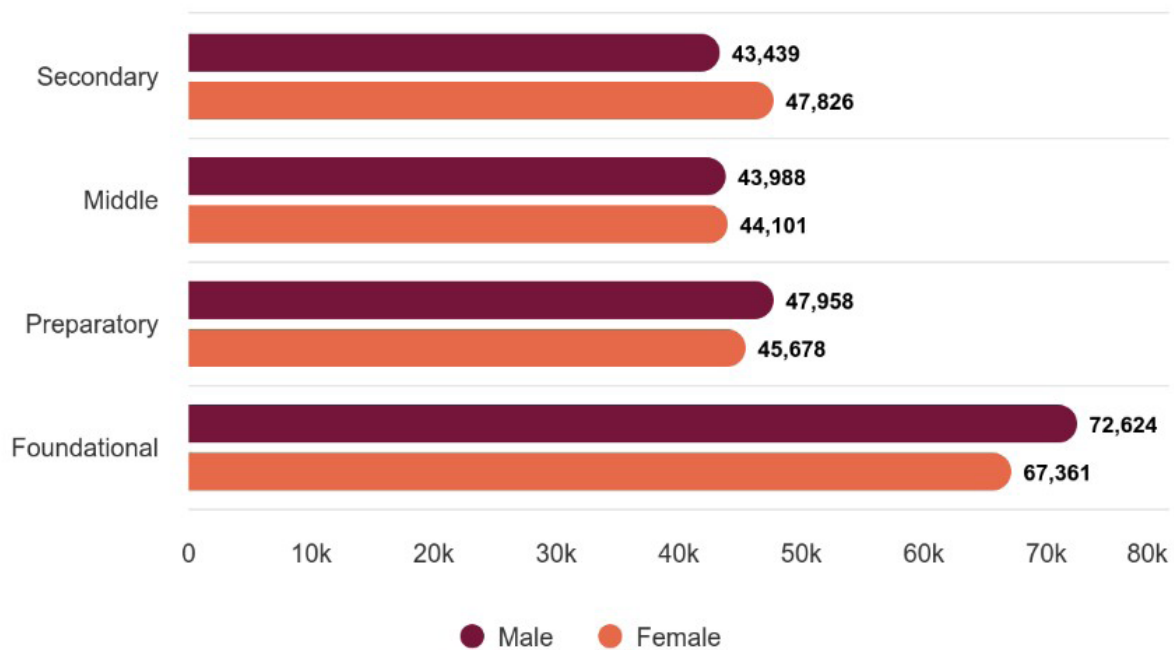

Even though the state has a low drop-out rate of 10 per cent at the secondary level, its enrolment ratio at this level is also quite low at 50 per cent only.

As per the Performance Grading Index 2.0 (PGI) of the Government of India, Bihar is in Akanshi - 2 category with a score of 465. This category is better than Akanshi - 3 which is the lowest category of scores. There are 11 other states and UTs with Bihar in Akanshi - 2 category. There are 21 states and UTs which are above Bihar in PGI 2.0 and only 3 states / UTs below it.

Spread of schools in Nagaland

Enrollment By Level Of Education & Gender

There is not much gap between enrolment rates at the middle and secondary levels in the state. Figures of UDISE + 2023-24 show that almost all students enrolled in schools at the middle level, make a successful transition to the secondary level. But the importance of vocational education cannot be overstressed in the face of low enrolment ratios at the secondary level.

Some Government Institutions Offering Vocational Courses in Nagaland

Sr. No	Name of the Institute	City / District	Courses / Trade	Address
1	Government Industrial Training Institute	Kohima	Electrician, Fitter, Welder, Mechanic Motor Vehicle, Plumber, Carpenter, Draughtsman Civil	Bayavu Colony, Above Sekhose Petrol Pump, High School Road, Kohima, Pin 797001

DIBRUGARH

Workshop No 2

GOOD FOR THOSE WHO
LIKE TO SPEND TIME CLOSE
TO NATURE, PLAYING
WITH PETS OR WHO ARE
FOND OF FLOWERS AND
PLANTS

AGRICULTURE

Agriculture is the science and practice of cultivating the land to grow crops and raise livestock for food, fiber, and other products. Agriculture and allied activities account for about 15.7 % of country's GDP and are estimated to employ about 124.7 million people as cultivators and 106.8 million as agricultural labour (Census 2001). The jobs in this sector include in animal husbandry, fishing and poultry farm management.

SAMPLE JOB ROLES

- Farm Mechanization & Precision Farming
- Animal Husbandry
- Fisheries
- Seed Industry
- Production Horticulture

SAMPLE JOB POSITIONS

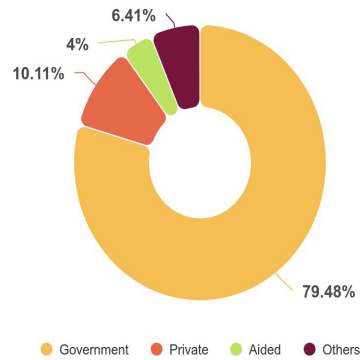

- Climate Change & Risk Mitigation Manager
- Dairy Farm Supervisor
- Farm Workshop Foreman / Supervisor
- Flower Handler - Packaging & Palletising
- Farm Workshop / Service Manager

Background

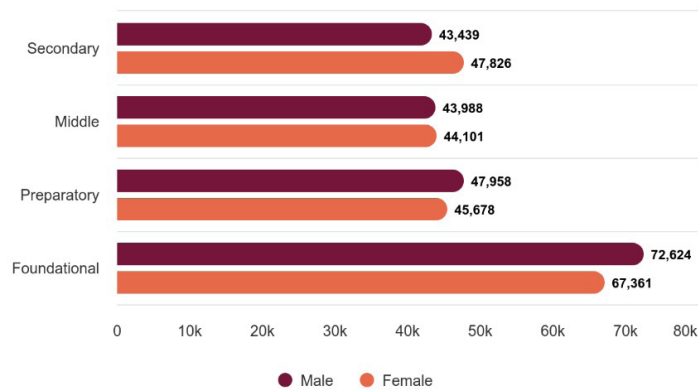

As per UDISE+ report of 2023-24, there are 56630 schools in Assam which cater to 69.2 lakh students. More than 79 per cent schools are government schools; about 10 per cent schools are private and there are another 6 per cent “other” category schools. Government schools cater to 72 per cent of the state’s school-going students while 22.7 per cent students go to private and other schools. The state has around 3.4 lakh school teachers.

As a result of several Government measures to improve the quality of education, the dropout rate of students at secondary levels has declined to 19.5 per cent. Transition rate from middle to secondary level is a good 82.6 per cent.

PM SHRI JNV DBRG (ASSAM)

PARAKH

Group - 4 Group Name - "Creativity"

Name - Jyoti Dasika
Aim - Scientist

Why to become - I want to become a scientist because I want to explore more in the field of science, and specially about the space. And I want to know more about space and also I want to discover new things which are unknown to the world & everyone.

How it benefit - me - I am very interested in these things and if I do the office and that things, I would be able to spend so to become a scientist I will benefit me and I will become happy and will be able to know more about these things.

Others - I will teach others what I will learn and there will be more advance things in future so that everyone must be happy and able to do things more easier.

Name - Sushanta Chelva
Aim - Merchant Navy

Why to become - I like this profession and I want to travel to different countries and different places. And I like to see the massive life so much so I think this will make me happy.

How it benefit - me - I will get much money or this job.

Others - I will share the experience of my traveling the different parts of the world and I can teach everyone about the things.

Name - Prityakshi Sonowal
Aim - Doctor

Why to become - I like this because I want to treat the ill people, the poor & the person who can't afford the price of hospitals. So that they will be treated well and everyone will become healthy.

How it benefit - me - I will be able to know more about the world.

Others - I will help others and everyone will become healthier and happier.

Name - Testyona Boruah
Aim - Doctor

Why to become - I like this profession because I want to help others by free treatment.

How it benefit - me - I will get the knowledge about the world.

Others - I will improve the health condition of other poor people.

Name - Kousteri Meek
Aim - Civil Engineer

Why to become - I want to support the financial condition of my family. And I will make great buildings and road.

How it benefit - me - I want to explore more and want to treat the world.

Others - I will also help the poor people and I can teach them how to use their financial use.

Name - Dishu Boro
Aim - Teacher

Why to become - I want to become a teacher because I think that teacher is the person who gives all the skill knowledge to new generation.

How it benefit - me - I will be able to know and will also learn more about this profession.

Others - I will teach in the school poor area where people are not able to give their education for the high admission fees.

- Finisher and Packer
- Sewing Machine Operator
- Hand Embroiderer
- Washing Machine Operator

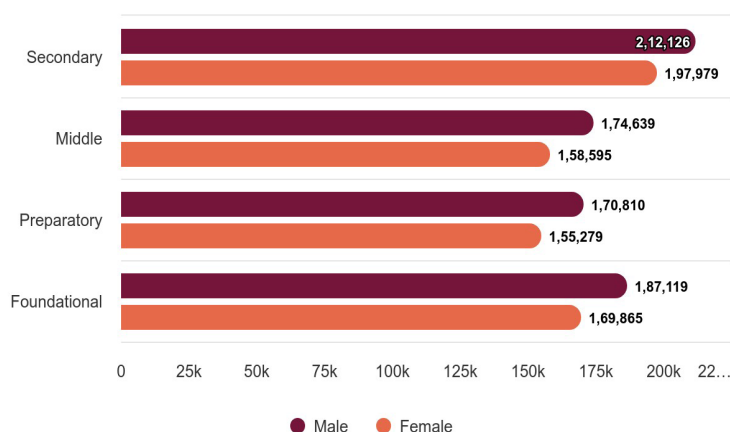

Background

There are 17826 schools in Himachal Pradesh, as per UDISE+ data for 2023-24, which cater to 14.2 lakh students. More than 85 per cent schools are government schools; about 15 per cent schools are private and “other” category schools. Government schools cater to 58 per cent of the state’s school-going students while 42 per cent students go to private schools. The state has around 1 lakh school teachers.

As a result of several Government measures to improve the quality of education, the dropout rate of students at secondary level has declined to 4.6 per cent. Transition rate from middle to secondary level is an excellent 97.7 per cent.

Tools and Equipment

Truncated tools

Optical Fiber

Optical fiber is used as transmission media for data communication.

Requirement of Splicing
 Fiber cables are widely applied in design communication network. They are buried under the ground for long distance. Fiber cables are quite susceptible for information transmission and data handling. They are used also for communication systems. Core and cladding are made of different materials and optical fiber cable is made up of glass or plastic material. It is used as a waveguide for light signals. It is used in optical communication systems. It is used in optical communication systems. It is used in optical communication systems.

- Insurance
- Banking and Financial Services
- Equity
- Loans

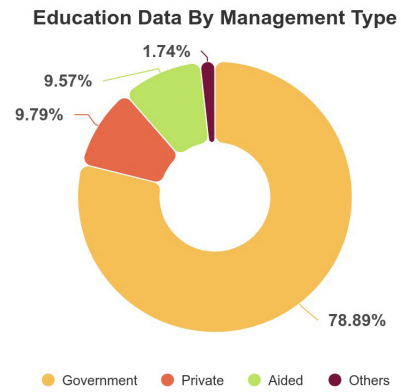

SAMPLE JOB POSITIONS

- Microfinance Executive
- Loan Approval Agent
- Credit Processing Officer
- Insurance Agent
- Equity Dealer

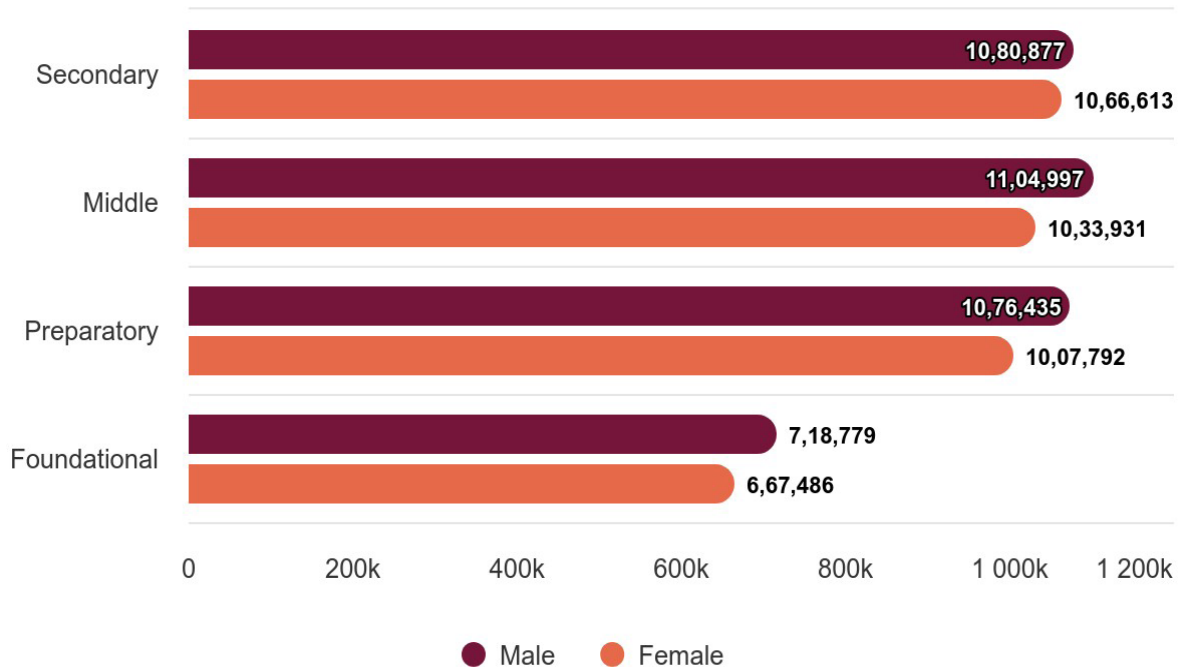

Background

There are 61693 schools in Odisha which cater to 77.5 lakh students, according to UDISE+ report for 2023-24. More than 78 per cent schools are government schools; about 10 per cent each are private and aided schools while the rest of the schools are "other" category schools. Government schools cater to 67 per cent of the state's school-going students while 19 per cent students go to private schools and the rest 12 per cent go to aided and other schools. The state has 3.3 lakh teachers.

The gross enrolment ratio at middle level is 96.7 per cent but it drops to 70.2 per cent only at the secondary level. Dropout rate at secondary level is 9.1 per cent while the transition rate from middle to secondary level is a good 92.9 per cent.

Background

There are 230 schools in the Union Territory of Chandigarh which cater to roughly 2.6 lakh students, according to UDISE+ report for 2023-24. Roughly 52 per cent are government schools and 33 per cent private schools. A significant 15 per cent schools are in the "other" and aided categories. In a significant departure from the pattern in other states and UTs, in Chandigarh, close to 60 per cent students go to government schools and only 35 per cent go to private schools. The state has close to 10,000 teachers.

The gross enrolment ratio at middle level is 121.1 per cent and at the secondary level it is 109.5 per cent, which is among the best in the country. Dropout rate at secondary level is 5.2 per cent while the transition rate from middle to secondary level is a whopping 98.6 per cent.

Media & Entertainment

Media is the tool used to deliver information or important matter.
Ex → Television, newspaper.

POWER OF MEDIA
Media has the power of shaping someone's character & thoughts. It also gives the opportunity to pupil who don't have opportunities.

TECHNOLOGY IN MEDIA
Most efficient as it reduces production by digital tools.
Real time interaction or livestream.
Merging formulas.

Media Literacy...
Is about application of critical thinking skills to the media.
SKILLS - evaluation of content
- content creation
- awareness

ADVERTISEMENTS

Channels related -
- ABP NEWS
- NDTV
- DISCOVERY

FUTURE OF Media
• Indian media & entertainment industry is expected to grow CAGR of 8.3% to reach 365,000 Cr by 2028

DIVERSITY IN Media
• Helps in understanding different cultures & practices.
• Reflects the reality of life among cities
• Accurate, challenges stereotypes & encourage dialogues.
Ex → Igaan

ETHICAL IMPLICATIONS
• 4Cs - critical thinking (news)
- collaboration
- communication
- creativity (film industry)

IMPACT OF Media
• Enrichment of minds with knowledge & for developing skills.
• Acquiring & sharing informations.

GEMS & JEWELLERY

Diamond	Ruby	Emerald
Opals	Lapis Lazuli	Coral

Significance of gems & jewellery in modern India

Gems and jewellery have captivated humanity for millennia, serving as both adornment and valuable commodities. They are formed through intricate geological processes, harnessing the earth's natural resources. Diamonds, rubies, sapphires, and emeralds, along with a vast array of semi-precious stones, are prized for their brilliance, color, and rarity. Jewellery, crafted from precious metals like gold and silver, often incorporates these gems to create exquisite pieces that reflect cultural heritage, status, and personal style. The industry encompasses various facets, including mining, sourcing, design, manufacturing, and retail, employing skilled artisans and contributing significantly to the global economy.

Workshop No 16

GOOD FOR THOSE
WHO LIKE MAKING
DESIGNS, ARE CREATIVE
AND HAVE A GOOD EYE
FOR FINE WORK

HANDICRAFTS & CARPETS

These are items which are made by hands, hence the term "Handicraft". Within this sector, carpets form a huge segment. There are also idols, brassware, jute, bamboo and stone work which is done by hands and involves craftsmanship. Many handicrafts are part of the culture and heritage of India and they need to be preserved through propagation and involvement of young talent.

SAMPLE JOB ROLES

- Carpet making
- Ceramics
- Glassware
- Hand crafted textiles
- Hand crocheted textiles

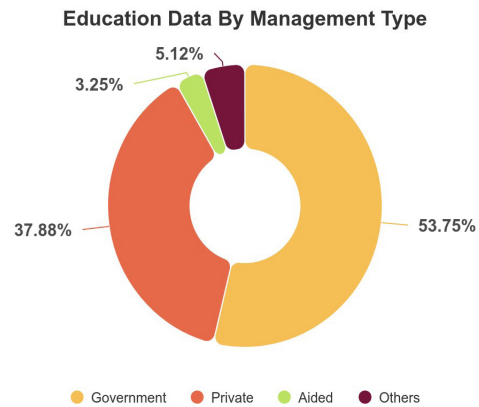

SAMPLE JOB POSITIONS

- Assistant Designer & Shade Writer (Carpets)
- Carpet Quality Checker
- Carpet Weaver
- Clipper and Embosser (Carpets)
- Washer (Carpets)

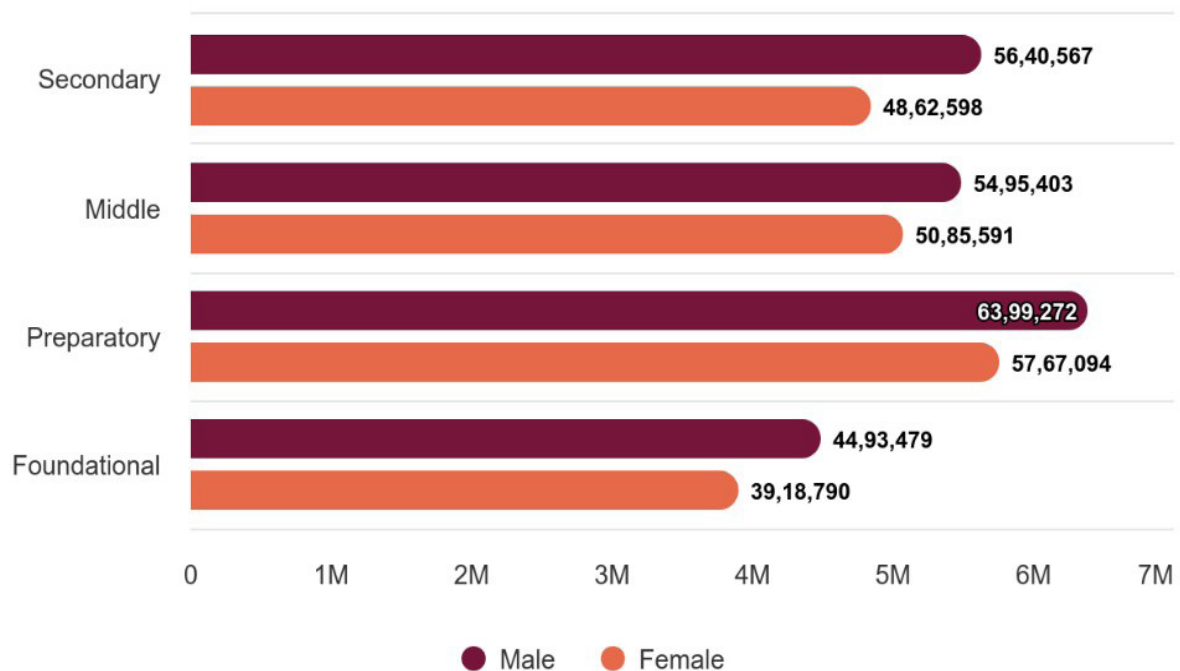

Background

There are 2.58 lakh schools in Uttar Pradesh which cater to 4.1 crore students, according to UDISE+ data for 2023-24. More than 53 per cent schools are government schools and 37 per cent are private, aided and “other” category schools comprise roughly 10 per cent of the schools in the state. Government schools cater to 38 per cent of the state’s school-going children while 47.4 per cent children go to private schools; aided schools and “other” category schools take care of 15 per cent of the state’s school-going children. The state has 15 lakh school teachers.

The gross enrolment ratio at middle level is only 78.8 per cent which is among the poorest in the country and it drops to mere 58.5 per cent at the secondary level. Dropout rate at secondary level is 5.9 per cent, while the transition rate from middle to secondary level is 76.9 per cent only.

Background

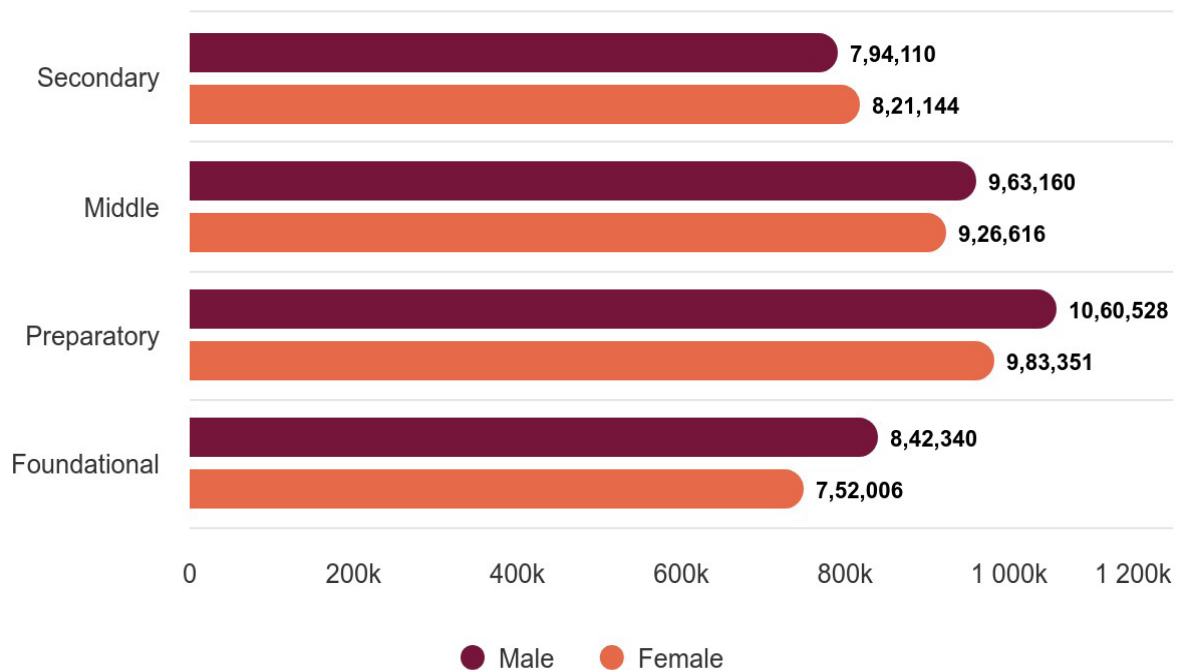

There are 44475 schools in Jharkhand which cater to 71.4 lakh students, according to UDISE+ data for 2023-24. Almost 80 per cent schools are government schools. There are only about 3 per cent private schools while the rest of the 17 per cent schools are aided or "other" category schools. Despite their smaller numbers, private, aided and other schools cater to roughly 42 per cent of the state's student population. The state has 2.1 lakh school teachers.

The gross enrolment ratio at middle level is 82.5 per cent and it drops sharply to 51 per cent at the secondary level. Dropout rate at secondary level is 10 per cent, while the transition rate from middle to secondary level is 67.2 per cent only.

Health Care

Health care refers to the maintenance and improvement of human health through the prevention, diagnosis, and treatment of disease, illness, injury, and other physical and mental impairments in people.

Here's some key information about healthcare:

- Core Components:**
 - Prevention: Focus on stopping health problems before they occur (e.g., vaccination, healthy lifestyle).
 - Diagnosis: Identifying and classifying a disease or condition.
 - Treatment: Providing care to address and manage health issue.
 - Rehabilitation: Helping people recover from injuries and illness and regain their independence.
- Healthcare Professionals:**
 - Physicians
 - Nurses
 - Dentists
 - Therapists
 - Surgeons
 - Many other specialized roles.
- Healthcare System:**
 - The organization and delivery of healthcare.
 - Well-maintained facilities with advanced medicines.
 - The health care workforce.

INFRASTRUCTURE EQUIPMENT

Infrastructure equipment refers to the tangible assets and tools that support the functioning of a country, region, or organization. These include various physical structures, facilities, and systems that are essential for a society to function. Examples include roads, bridges, power grids, communication systems, and water / sewage treatment plants. Making these large equipment requires huge manpower and is a big employment generator.

- Hydra Crane Operator
- Wheel Loader Operator
- Crusher Operator
- Junior Hot Mix Plant Operator

Background

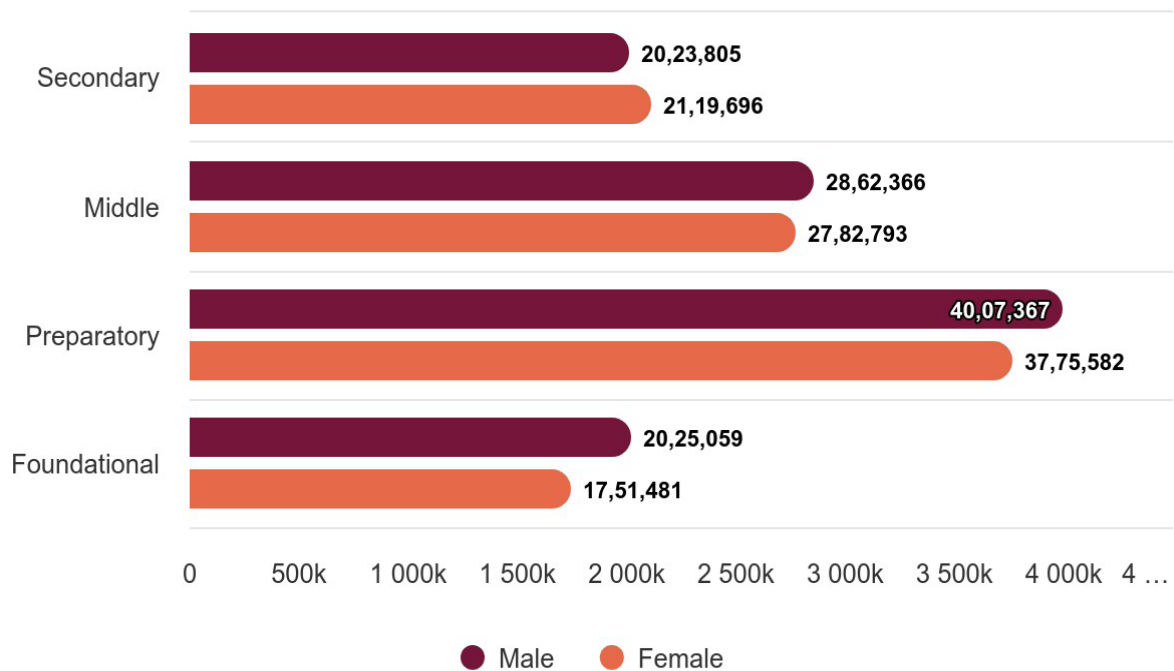

There are 94686 schools in Bihar which cater to 2.1 crore students, according to UDISE+ data for 2023-24. More than 82 per cent schools are government schools; about 9 per cent are private schools; the rest 9 per cent schools are either aided or come in the "other" category. Government and aided schools cater to 87 per cent of the state's school-going children while 13 per cent children go to private schools. The state has 6.5 lakh teachers.

The gross enrolment ratio at middle level is 68.4 per cent but it drops to mere 37.8 per cent at the secondary level. Dropout rate at secondary level is 20.9 per cent, while the transition rate from middle to secondary level is 31.5 per cent only.

MINISTRY OF EDUCATION

Hydrocarbon - we can use the gaps or in between for greener purpose.

Logistics - We can use the process of data feeding.

SAVE TIME SAVE LIVES

GREEN JOBS
 → Take use of natural resources like solar, wind energy
 → planting trees and softening between roads.

MEDIA
 → Spreading awareness on traffic signals, and vehicle management

TELECOM
 → Skilled Telecom infra-structure engineers are used to develop AI based traffic bot.

MANAGEMENT: Using management supervisors, traffic controllers, Stop accidents

RITC
R - Reduction of Infrastructure development
I - of Traffic
T - of Traffic
C - Congestion

WOW - World Of Work
Handicraft & Carpet
PARAKH

PROBLEM

- No One is buying Handicrafts and carpet with their own hands. They are buying from a shop.
- Lack of awareness
- Transportation → It is too costly and difficult to reach areas.
- People who sell are not getting their profit.
- Unemployment of women.

SOLUTION

- Spreading awareness → Advertising posters.
- Training unemployed so that they can open up their own shops on short their business.
- Making shops that hand-craft branches each and every corner of the world.

Disadvantages

- It would take a lot of time to meet the people from different regions.
- There are many people with different preferences.
- It would take a lot of time of convincing customers.

Advantages

- By this we can build our own bank.
- Many people would get app identifying their own company.
- Instead of dollars for handicrafts, the products, women and disabled people can get employed.

NOGYO MACHINES & APP Group - 1

NOGYO MACHINES

Multi-Purpose Agricultural Vehicle

Automotive

Advantages

- **Cleaning** - Can save seeds.
- **Spraying** - Can spray water or fertilizers.
- **Cultivating** - Can perform cultivation operation like plowing.
- **Planting** - Can plant the seeds.
- **weeding** - Can remove weeds.
- **weeds/pest application** - Can apply weed/pest.
- **Local transportation** - Can be used to transport materials locally.

Multi-Purpose Agriculture Vehicles Can be beneficial in many ways, including

- **Increased Productivity** - Can increase crop yield and quality.
- **Reduced Cost** - Can reduce the cost of production and certain operations.
- **Reduced Human Efforts** - Can reduce the amount of manual labour required.
- **Reduced Environmental Impact** - Can reduce the use of energy and reduce use of fuel fuel.

• **Cost effective** - Can be low cost for farmers.

• **Can better help** - Can work in more weather conditions, 24 hours a day, all year round.

• **Manufacturing Drones** - They are used for multi-purpose like to spray and water fertilizers & seeds etc.

App Developing

About this App - This app used for to check the working machines and spare part of the vehicle.

- This app also provide website for rest.
- This app can also help to deliver organic food.
- It also check the measure and fertilizers for farmers.
- This app can also suggest the farmers the methods of organic farming.

Health Care Group-2

Ayurveda is an alternative medicine system with historical roots in the Indian subcontinent. It is heavily practiced throughout India and Nepal, where as much as 80% of the population report using ayurveda. The theory and practice of ayurveda is pseudo-scientific and toxic metals such as lead are used as ingredients in many ayurvedic medicines.

Herbal Care Staff members

Background

There are 58722 schools in Tamil Nadu which cater to 1.29 crore students, according to UDISE+ data for 2023-24. Sixty four per cent schools are government schools; about 14 per cent are aided schools; 21 per cent private schools and the rest are "other" category schools. Government and aided schools cater to 54 per cent of the state's school-going children while 46 per cent children go to private schools. The state has 5.5 lakh teachers.

The gross enrolment ratio at middle level is 101.6 per cent but it drops to 89.5 per cent at the secondary level. Dropout rate at secondary level is 5.4 per cent, while the transition rate from middle to secondary level is a fantastic 100 per cent.

World of Work

PARAKH

Problem is that Paper wastage?
 → Our solution is this is that we can collect as much recycled paper as we can and by collaborating with the Reserve bank of India by sponsoring the paper we can reduce the paper to make currency from recycled paper we can recover from cutting trees.

Problem is that Plastic wastage?
 → The solution for this problem is that by having specialized companies who will separate people can recycle glasses and plastic and based on the weight of items they donate, will be paid.

 Gain
 Of
 Recycle

Advantages of this

The biggest advantage is that we can now expect more and more people to use the dustbins properly. Our project is that, we divide each dustbins into numerous types, each of one them will have different components like one dustbin will contain paper which can be crushed. It can be made into pulps and again used as paper. The paper is sold by our company which would make profit for us. The next bin would be for vegetable scraps and organic/kitchen waste. It can be turned into manure and used in fields so we will get more food crops, there would be a decline in food scarcity. The next bin would be for glass. The glass can be sold and we can also use it for beautification/decoration. Those who do it in a proper way gets money. The one who puts it in the correct bin would get money from the person particular bin. When the put the subject waste in subject bin, the machine would identify it if its correct or not, and will give money according to that. The plastic would be used again, instead of burning and this can lead to less pollution, also a paper recycling can lead to less deforestation and those trees can be a habitat to many plants and animals.

PARAKH

- Skill Development Programs - Job Practical skills like coding, graphic design, digital marketing.
- Vocational Training - Offer hands-on training to make the learning meaningful.
- Franchising & Job - Franchising can provide job opportunities.

World Of Work (banish)

Group-7

Helping students recognize reality in today's guidance opportunities community support.

We need a business that combines impact sustainability

Both physical & mental health are important

Some way to make positive impact are

- 1) Engaging activities & hobbies
- 2) Sports & fitness clubs - football, martial arts
- 3) Gaming & E-Sports - if they are interested in gaming guide them towards careers in game development or streaming.

Mental health & motivation:

- 1) Counseling & Therapy
- 2) Motivational talks & Books
- 3) Mentorship Programs.

Spreads can be powerful tool to help students recognize by giving them purpose.

GREEN SOURCE

A farmer who need water for agriculture, farmer use a motor for pumping the water. But there is was an electricity for farming nearby makes the farmer buy some solar panel from Green source our solar panel has low price.

A child who was born in Africa they don't have electricity in his village he think that he should generate the electricity from the wind and he used a turbine from his father. The boy invented the windmill and he was the founder of green source company.

Hydroplant turbine -

- 1. Cost customer can 4000000 available for 200 hour

Background

There are 23517 schools in Haryana which cater to 55.9 lakh students, according to UDISE+ data for 2023-24. More than 61 per cent schools are government schools; about 35.7 per cent are private schools and the rest are aided or "other" category schools. Private schools cater to 58.6 per cent of the state's school-going children while the rest go to government or aided schools. The state has 2.5 lakh teachers.

The gross enrolment ratio at middle level is 100 per cent but it drops to 77 per cent at the secondary level. Dropout rate at secondary level is 11.4 per cent, while the transition rate from middle to secondary level is 89.9 per cent.
