

## **Narayanan Ramakrishnan**

Narayanan Ramakrishnan is the CEO of Invention Labs, a leading assistive technology company that makes communication and language learning products for people with disabilities. Narayanan is passionate about creating technology solutions to empower people to achieve their full potential.

He graduated with a Masters in Computer Science from Georgia Institute of Technology, Atlanta. To work on his passion Narayanan returned to India to join Invention Labs in 2012. Heading the transition from device to app, he was instrumental in developing the first version of Avaz for the global markets. In 2018, Narayanan took over as the CEO of Invention Labs.

Narayanan is deeply involved in interactions with the final users of solutions built at Invention Labs. Building prototypes that holistically address challenges faced by parents, teachers and AT users of all ages and translating them into a scalable product, is something he is especially interested in.

He has built other AT solutions. Including FJ Typer - a desktop based Touch Typing tutor software for the visually impaired which was showcased at the Microsoft Accessibility Summit 2017. He has also worked on a wearable glove that enables people to learn music while enjoying rehab exercises, among others.

His goal is to create an inclusive world, where every student can learn in the way that's best suited for them.
