

Pulkit Sapra is an IIT graduate and skilled product developer with 7 years of experience in the area of assistive technology. He is the co-founder of Raised Lines Foundation (RLF), a nonprofit startup focused to solve the challenge of limited access to diagrams for visually impaired students and chief inventor of DotBook, India's first Braille laptop. Prior to RLF, he worked as a senior researcher at Assistech Lab, IIT Delhi in the field of assistive technologies. He was a core member of the translational research team for multiple products – SmartCane, OnBoard, Tactile graphics and other AT products. Pulkit envisions to bring a transformational change in the quality of education for blind students so that they have equal educational opportunity as their sighted peers. Pulkit and his work has received many national awards from DST, Nasscom, Microsoft and others. You can connect with him through <https://www.linkedin.com/in/pulkit-sapra-4092a7a9/>.
