CONSTRUCTIONS

(A) Main Concepts and Results

- To bisect a given angle,
- To draw the perpendicular bisector of a line segment,
- To construct angles of 15°, 30°, 45°, 60°, 90°, etc.
- To construct a triangle given its base, a base angle and the sum of other two sides,
- To construct a triangle given its base, a base angle and the difference of other two sides,
- To construct a triangle given its perimeter and the two base angles
- Geometrical construction means using only a ruler and a pair of compasses as geometrical instruments.

(B) Multiple Choice Questions

Sample Question 1: With the help of a ruler and a compass, it is possible to construct an angle of :

(A) 35°  (B) 40°  (C) 37.5°  (D) 47.5°

Solution : Answer (C)

Sample Question 2: The construction of a triangle ABC in which AB = 4 cm, \(\angle A = 60^\circ\) is not possible when difference of BC and AC is equal to:

(A) 3.5 cm  (B) 4.5 cm  (C) 3 cm  (D) 2.5 cm

Solution : Answer (B)
EXERCISE 11.1

1. With the help of a ruler and a compass it is not possible to construct an angle of :
   (A) 37.5°  (B) 40°  (C) 22.5°  (D) 67.5°

2. The construction of a triangle ABC, given that BC = 6 cm, ∠B = 45° is not possible when difference of AB and AC is equal to:
   (A) 6.9 cm  (B) 5.2 cm  (C) 5.0 cm  (D) 4.0 cm

3. The construction of a triangle ABC, given that BC = 3 cm, ∠C = 60° is possible when difference of AB and AC is equal to :
   (A) 3.2 cm  (B) 3.1 cm  (C) 3 cm  (D) 2.8 cm

(C) Short Answer Questions with Reasoning

Write True or False and give reasons for your answer.
Sample Question 1 : An angle of 67.5° can be constructed.

Solution : True. As 67.5° = \( \frac{135°}{2} = \frac{1}{2}(90° + 45°) \).

EXERCISE 11.2

Write True or False in each of the following. Give reasons for your answer:

1. An angle of 52.5° can be constructed.
2. An angle of 42.5° can be constructed.
3. A triangle ABC can be constructed in which AB = 5 cm, ∠A = 45° and BC + AC = 5 cm.
4. A triangle ABC can be constructed in which BC = 6 cm, ∠C = 30° and AC – AB = 4 cm.
5. A triangle ABC can be constructed in which ∠B = 105°, ∠C = 90° and AB + BC + AC = 10 cm.
6. A triangle ABC can be constructed in which ∠B = 60°, ∠C = 45° and AB + BC + AC = 12 cm.

(D) Short Answer Questions

Sample Question 1 : Construct a triangle ABC in which BC = 7.5 cm, ∠B = 45° and AB – AC = 4 cm.

Solution : See Mathematics Textbook for Class IX.
EXERCISE 11.3

1. Draw an angle of 110° with the help of a protractor and bisect it. Measure each angle.

2. Draw a line segment AB of 4 cm in length. Draw a line perpendicular to AB through A and B, respectively. Are these lines parallel?

3. Draw an angle of 80° with the help of a protractor. Then construct angles of (i) 40° (ii) 160° and (iii) 120°.

4. Construct a triangle whose sides are 3.6 cm, 3.0 cm and 4.8 cm. Bisect the smallest angle and measure each part.

5. Construct a triangle ABC in which BC = 5 cm, ∠B = 60° and AC + AB = 7.5 cm.

6. Construct a square of side 3 cm.

7. Construct a rectangle whose adjacent sides are of lengths 5 cm and 3.5 cm.

8. Construct a rhombus whose side is of length 3.4 cm and one of its angles is 45°.

(E) Long Answer Questions

Sample Question 1: Construct an equilateral triangle if its altitude is 6 cm. Give justification for your construction.

Solution: Draw a line XY. Take any point D on this line. Construct perpendicular PD on XY. Cut a line segment AD from D equal to 6 cm.

Make angles equal to 30° at A on both sides of AD, say ∠CAD and ∠BAD where B and C lie on XY.

Then ABC is the required triangle.

Justification

Since ∠A = 30° + 30° = 60° and AD ⊥ BC, ΔABC is an equilateral triangle with altitude AD = 6 cm.

Fig. 11.1
EXERCISE 11.4

Construct each of the following and give justification:

1. A triangle if its perimeter is 10.4 cm and two angles are 45° and 120°.
2. A triangle PQR given that QR = 3 cm, ∠PQR = 45° and QP – PR = 2 cm.
3. A right triangle when one side is 3.5 cm and sum of other sides and the hypotenuse is 5.5 cm.
4. An equilateral triangle if its altitude is 3.2 cm.
5. A rhombus whose diagonals are 4 cm and 6 cm in lengths.
